

NORTHWEST ARKANSAS EDUCATION SERVICE COOPERATIVE

September, 1999

As superintendents of school districts throughout Northwest Arkansas, we are united with the University of Arkansas in supporting excellence in the preparation programs for school administrators. We enthusiastically accept our role as partners in this effort. We will provide intern sites for relevant and practical educational training. In addition, we will provide personnel for presentations on campus, will identify promising candidates for leadership studies, and will network with university personnel concerning staff development that we can share with graduate students. Finally, we will critique the graduate program in educational administration. Together, the University of Arkansas and area school districts will see that this program becomes nationally recognized for its excellence.
